## Innovative Solutions Technology

There is an increasing demand for secure, scalable security solutions. Cloud solutions enable organizationd to leverage existing assets for their most sensitive workloads and use cloud for cloud appropriate workloads. **Fedramp Certified** cloud solutions further provide increased levels of security. Never trust, always verify is the objective. We help the government evaluate ways to adopt a Zero Trust mindset by identifying Data/Assets/Applications/Services, documenting and aligning them to mission objectives and securely designing systems to protect highly dynamic, distributed systems.
